Learn what casting directors are looking for and make the right choices when creating your About Me video.

Actors often wonder what to include and how long it should be. Think of this video as a moving headshot—a chance to showcase your personality, presence, and essence in a way that a photo or CV can't.

Make your first impression count with a compelling and authentic video.

PHOTO SHOOT

Photo session with Danny Fernandez from Retratos Barcelona.

Headshots are the key to breaking in as a professional actor. It doesn't matter how brilliantly talented you are; without the right headshot, the chances of anyone taking the time to discover that brilliance plummet. Headshots for actors are like business cards. An actor's headshot is their professional calling card.
